

Keep it Clean!

ALL STORM DRAINS LEAD TO THE RIDEAU!

AVOID RELEASING POLLUTANTS

- Wash your car at a commercial carwash that captures the wastewater
- Don't pour hazardous chemicals like car oil in storm drains; take them to a Household Hazardous Waste depot.
- Eliminate lawn and garden chemicals and fertilizers. If you must use fertilizers, reduce amounts and apply only in dry weather
- Pick up pet waste. Bury it or put it in a pet waste digester.
- Put your walkway and driveway on a low-salt diet
- Sweep your driveway with a broom instead of flushing it with a hose.
- Use dry clean-up methods to clean up oil stains. Take to HHW depot.
