

July 2023

Please consider these guidelines before donating any pill bottles:

- Only clear pill bottles with lids are accepted. So no white or dark brown vitamin bottles please, or other over the counter medication bottles.
- Labels must be completely removed from the outside with no residue left behind.
- Do not give us any pills or medications.
- Do not donate cracked or broken bottles.
- We will discard bottle with any miscellaneous markings on them.
- We will need to wash and dry them so there will be no residue remaining inside.
- These will be used to distribute small amounts of medication in developing countries, so cleanliness is crucial.
- If they are not clean or cannot be clean they will be discarded by REAL, there is not point making more work for Earthhub volunteers.
- We cannot continue this program if the majority of the pill bottles are not clean and usable.
- The bottles are sorted by size and colour. If you have a large donation and can do that that will save a step.
- If you would like to volunteer to wash and dry the bottles please contact us.

Pill bottles are delivered to EarthHub Ottawa, who process them for shipping. As there is a shipping cost to that non-profit organization, a .10 donation per bottle is suggested. You can put cash in a ziplock inside one of the bottles.
