Journey to Sustainability Resources

(provided in followup to October 2026 J2S Presentation)

While much of the "Living on Earth as if We Want to Stay" material was covered in our session on Wednesday, there is more material available on our web site. Some interesting links are copied below.

We are particularly pleased with our 8-minute video "To Be Alive and Well; It's Easier Than You Think" I told these stories, but they bare repeating. They show how our own material substance is abundantly available from natural cycles and how we are thoroughly enmeshed with all other life. Living within this framework provides a foundation upon which a sustainable future can be built. Share it around.

Other shorter videos are at:

www.sustainwellbeing.net/video_index.html

On the promising ability of young minds (teens to mid 20s) to understand the world they will be living in:

www.sustainwellbeing.net/serve_young_minds.html

7th Generation Initiative - Sustainability Project web site:

Links to most of my writing over the past couple of decades is linked at: Materials Available.

Notable among the articles there are:

* Three paragraphs on Life-Based Pursuits (My favourite.)

www.sustainwellbeing.net/life.html

Global Monopoly Game

http://www.sustainwellbeing.net/PEN_article.html

Three Potent Steps to a Sane Economy

http://www.sustainwellbeing.net/3potentsteps.html

The Greenest Dollar Is the One Not Spent

http://www.sustainwellbeing.net/Greenest-Dollar.html

My book L*ife, Money and Illusion Living on Earth as if We Want to Stay,* can likely be found through your library or used book sellers. We still have a few boxes available. Digital copies are available through New Society Publishers .

Another introduction to the "More Fun, Less Stuff" meme project is outlined at:

http://www.sustainwellbeing.net/Key.html

If you would like a "More Fun, Less Stuff" sticker or two, send an address & I will mail them out. They are good on cars, lamp posts, guitar cases, and other places bringing attention to the transformative meme.

Also effective for sharing the sustainability message are sustainability cards.

Of further interest:

Rupert Sheldrake and Morphogenetic Fields:

I don't have a direct link for Sheldrake's work, but you can find much to choose from by googling his name. Along with several articles in the past, I read his book *The Presence of the Past*.

While I could go on, there is a limit to how much anyone wants to read. You will find much more at www.sustainwellbeing.net .

Best wishes for any steps you can take to advance a sustainable world.

Mike Nickerson
